Date of Birth: 12/03/1999

Professional Summary

MERN Stack Developer with experience building scalable server-side applications, RESTful APIs, and database-driven systems using React, TailwindCSS, Node.js, Express, and MongoDB. Skilled in TypeScript, JavaScript, and modern backend practices, including authentication, data modeling, performance optimization, and API integration. Strong in debugging, writing clean and maintainable code, and collaborating with teams to deliver reliable features within defined requirements.

Education

9-Month Diploma: Professional Training Program (PTP) — Information Technology Institute (ITI)
Professional Development & BI-infused CRM — *Oct 2024 – Jul 2025*

Bachelor of Information Technology — Egyptian E-Learning University
Modules: Web Engineering, AI, Security, IT Fundamentals | GPA: 3.49 (Very Good) — *2018 – 2022, Assuit*

Experience

React Developer — May 2025 – Nov 2025
InformaCore Technologies — *Saudi Ministry of Justice Project - Amicable Settlement (Weddi)*

- Implemented modular front-end features using React and TypeScript to enhance functionality and user experience.
- Resolved front-end issues and refactored legacy components to improve code quality, stability, and maintainability.

MERN Stack Developer — Aug 2023 – Aug 2024
TopGrowth — *Educational and other company projects*

- Build and deployed new platform features using React, Node.js, Express, and MongoDB, ensuring smooth functionality and stable release performance.
- Enhanced user interface components and optimized backend logic to improve usability, responsiveness, and system efficiency.

Technical Skills

Frontend	:	React, Angular, HTML5, CSS3, Bootstrap, Tailwind CSS
Backend	:	Node.js, Express.js, .NET MVC, .NET Web API, C#, EF Core, RESTful APIs, PHP (Laravel basics)
Databases	:	Microsoft SQL Server, MySQL, MongoDB
Languages	:	C#, C++, JavaScript, TypeScript, SQL
Tools	:	Visual Studio, VS Code, Postman, Swagger
Development	:	OOP, SOLID Principles, Clean Architecture, CQRS, Algorithms, Data structures, Design Patterns, Git, Agile/Scrum, GitHub, Unit Testing
Soft Skills	:	Team collaboration, communication, client handling, problem-solving

Projects

Balance — Rele State Website (11/2024) — *React.js, Tailwind CSS*

- Developed a responsive real estate platform enabling users to browse, filter, and view property details with optimized performance and modern UI components.

Weddi — Friendly Settlement for Labor Disputes (05/2024) — *React.js, Tailwind CSS*

- Built core front-end modules for a digital dispute-resolution system, improving accessibility, workflow efficiency, and user experience for large-scale legal operations.

Real Estate Consulting Website *React.js, Bootstrap, Node.js, Express, MongoDB*

- Created a full-stack consulting platform allowing clients to request, track, and manage real estate consultations with secure API integrations and dynamic content rendering.

Task Management System (02/2025 – 03/2025) *.NET MVC, C#, Bootstrap*

- Developed an MVC task management application with real-time chat features, improving team coordination and workflow automation.

Spacecavez — Education Platform (08/2023) *React.js, Node.js, MongoDB*

- Built an online learning platform delivering structured educational content with secure authentication, course management, and scalable backend services.

Topgrowth Agency (10/2023) *React.js, Node.js, MongoDB*

- Developed dynamic marketing service modules and admin dashboards, enhancing content management and improving client engagement workflows.

TTN — Productivity Tools *Bootstrap, JavaScript*

- Created a suite of lightweight productivity tools, including task tracking, time management, and note-taking utilities, focusing on usability and clean UI.

Blog Website *React.js, Bootstrap, Node.js, MongoDB*

- Built a full-featured blogging system with user authentication, article CRUD operations, and an admin dashboard for content moderation.

Internships

ITI — Web Development Using ASP.NET Oct 2024 – Jun 2025
9-Month Training Program *Assuit, Egypt*

DEPI — MERN Stack Training Apr 2024 – Oct 2024
6-Month Training *Assuit, Egypt*

Ministry of Communications And IT — PHP/Laravel Nov 2022 – Jan 2023
Training *Assuit, Egypt*

ITI — Front-end Development Using Angular Jul 2021 – Aug 2021
Summer Training *Assuit, Egypt*

ITI — Soft Skills And Freelancing Program 24-Hour Training
Assuit, Egypt

Volunteering

Front End Training Lead January 2025 – April 2025
Information Technology Institute (ITI) - Assiut Intake 45 *Assiut, Egypt*

- Supervised front-end development tasks for ITI colleagues, reviewed code submissions, and ensured adherence to best practices and clean coding standards.
- Guided React concepts, UI patterns, and practical front-end techniques, helping colleagues improve code quality and problem-solving efficiency.

Technical Speaker At GDES Mar 2021 – Oct 2022
Egyptian E-Learning University *Assiut, Egypt*

- Conducted sessions to discuss modern web technologies.
- I participated in organizing a marathon to help students participate in Google's Solution Change competitions.

Awards and Competitions

- ACPC 2019 🔗 – Ranked 60st among 400 teams.
- ACPC 2020 🔗 – Secured 40th position out of 425 teams.
